

## Cyber Security Awareness Month at Catena Media

October is the International Cyber Security Awareness Month. It is an ideal time for Catena Media's Information Security Team to publish resources for those who want a better understanding on staying safe in this ever-changing digital world.

Gianella Borg, Information Security Team Lead here at Catena Media says:

"Cybersecurity awareness has never been more important than right now. From government hacks, ransomware attempts, to malware data breaches, cyber fraud is at an all-time high. Cybercriminals will not leave one stone unturned in their search for

profit or power. No one is immune, and cyber thieves know no boundaries. This realisation is a big part of why everyone is coming together to create more global awareness."

Catena Media's Information Security Team will be sharing articles, infographics and other resources throughout October. The aim is to generate awareness and support to prepare both employees and people in our network for anything that might come their way. We hope this will empower you to keep yourself and your data safe online.

Do Your Part. #BeCyberSmart
